

## "LIFE THROUGH THE LENS"

### MESHED TOGETHER

This unbelievable gizmo made by a friend as a birthday present is based on the Fibonacci Spirals. What are the Fibonacci Spirals, you might ask. Well, prepare to be amazed. ( While I had a basic understanding, I had to ask "Google" to help with the explanation)

A perfect example is the nautilus shell, whose chambers adhere to the Fibonacci sequence's logarithmic spiral almost perfectly. This famous pattern is everywhere in nature, including flowers, pinecones, hurricanes, and even colossal spiral galaxies in space.

To create the Fibonacci Sequence, take a calculator and begin by adding  $1 + 1$  to get 2. Then, add  $1 + 2$  to get 3. Then add  $2 + 3$  to get 5. Continue as long as your calculator can handle it — the numbers quickly get quite big. The sequence theoretically continues infinitely even after the numbers exceed the calculator's abilities.

Because of the pattern and the perfect meshing of the gear teeth created by the craftsman, as impossible as it may appear, these spirals can be spun in either a clockwise or counter-clockwise direction.

God wants his life to mesh with and interact with your life, my life, and everyone on this earth. Not to control, but so that we might experience his forgiving love and be amazed by its greatness.

When you allow your life goals to mesh and work with God's plans, you can link together, and exciting things will happen.

" For I know the plans I have for you," declares the LORD, "plans to prosper you and not to harm you, plans to give you hope and a future. **(Jeremiah 29:11)**" You might think, "Surely, would God want me to be part of his plans? What could I do that would make God happy? It doesn't make sense!" Neither do the Fibonacci Spirals until you experience them.

Talk to God. Ask him about his plans for you. Let him help you and give you the understanding and confidence to join in his plans.

Cheers, and God bless.

Kevin
